Colour Burst Displays

The different dimensions allow you to build your colourful crate wall in the most awkward of spaces. From under stairs to in-between cabinets, the versatility of these crates has proved very popular indeed. Crate walls are ideally built with the small 300mm and large 600mm sizes. You can build with this 500mm size as well but you will find these walls are more irregular.

Beautiful mobile colour burst crate merchandise displays are available in a selection of configurations in our Crate Display category. You can, however build you own mobile colour burst displays by purchasing the Base and Casters and selecting your own combination. We definitely recommend building your mobile displays with the small and large crate sizes. For a more classically rustic display you may prefer our Rustic Brown Crate.
